2-Way Scanning for All Your Needs

ADF Scanning

Flatbed Scanning

Place on Flatbed

Save Time by Reducing the Number of Scans Multi-Crop

Place various sized documents on the flatbed and scan them all at once, then crop whatever parts you need. This is convenient for scanning multiple business cards and thick documents.

Place documents in ADF
Place a book on Flatbed

Easily Get the Data You Need from Each Page 2-Page Separation

Use the flatbed to scan 2-page spreads from books, magazines, etc., and automatically divide the single image into two single sheets*. Dividing scanned documents saves time and trouble because it makes complex editing operations unnecessary.

*Divided lengthwise or crosswise. The length of the scanned document is divided in half. The division is not based on the content of the document.

Hassle-Free Consecutive Scanning ADF/Flatbed Scanning

Now you can consecutively scan ADF and flatbed documents in one simple operation, greatly improving work efficiency.

Accurately Feed Various Sizes of Documents Mixed Document Feeding

Documents with different sizes and thicknesses can be fed together. They can be centre, right or left justified. By using left or right justification, there is no more need to spend time organising documents according to their size, so scanning is fast and easy. This function greatly increases your productivity.

High-Speed Scanning for Long Paper Long Paper Mode

The highly reliable paper feed mechanism quickly and accurately scans long documents. This function boosts work efficiency by smoothly scanning long monitoring sheets, like those used for EKG documents.
